## STRENGTH TABLE

SAL SYG 300-6,5-9		Acceptable windage of traffic signal lights and signs [m2] for Cx=1,2			
code 42863		Vref. = 22 m/s	Vref. = 24 m/s	Vref. = 26 m/s	Vref. = 28 m/s
Acceptable mass of single traffic signal light [kg]		I zone, III Field category up to	I & III zone, III Field category up to 450m by s.I	II zone, III Field category up to	III zone, III Field category up to 755m by s.I

<sup>1)</sup> Increasing the weight of the traffic lights set affects the load capacity of the column and reduces the permissible surface of the traffic lights set, which requires the analysis of the column in terms of strength and determination of a new permissible surface of the set.

<sup>2)</sup> In order to determine the foundation dimensions, please send the catalog cards of the equipment that will be installed on the column and its arrangement. For the values presented in the chart and the arrangement of signaling devices as shown in the diagram below, it is recommended to make a cast foundation with dimensions LxBxH = 1x1x1.6m.
